12-18

Pinus Strobus, L.

12

While pines like that may have stood in the primeval forests on the southern end of Spirit Pond and the eastern edge of the reservation, Virginia wood and the grove on the slope south of the North Reservoir are the finest groves. Small groups and trees are to be found in many places but they are not so generally distributed, neither do they seem as likely as in the Blue Hills, to become the prevailing tree ultimately.

M&94. Aug 4 - Mg. to. Woods NW. Canada.
